FY-66
BUDGET

--

25X1

This contract provides for a level of effort of 25 man-years, including the time of scientists, engineers and other direct labor personnel. It further provides for work in the following technical areas:

1. Viewing Equipment
2. Projection Techniques
3. Color Enlarging
4. Data Handling
5. Image Enhancement
6. Clean Room Techniques
7. Light Sources
8. Mensuration Techniques.

To date, we have not been excessively successful in reaching agreements on suitable projects attractive to both parties. While, therefore, we are submitting a few suggestions herewith for consideration, we are preparing the budget on the basis of a hypothetical distribution of labor categories in the amount of 25 man-years.
